Skills

- **Programming:** C, Java, Python
- **Frontend:** HTML, CSS
- **Core:** Data Structures, Problem Solving

Projects

Street Light Using Solar Panel *Duration: 1 week*

Technologies: Solar Panel, LDR Sensor, Charge Controller, Battery, LED

- Developed a solar-powered street lighting system using a solar panel, battery, charge controller, and LED light.
- Used an **LDR sensor** to detect light intensity and automatically control the street light.
- Analyzed light-intensity patterns to improve energy efficiency and reduce unnecessary power consumption.
- GitHub Repository

Experiences

- **Fresher** – Currently seeking opportunities to gain practical industry experience and apply programming and problem-solving skills.

Achievements

- Completed **Introduction to Unix** course on the **Infosys Springboard** platform.

Education

B.E. in CSE (Data Science) 2025–2026
Adichunchanagiri Institute of Technology, Chikkamagaluru *CGPA: 7.10*

PUC 2023–2025
BGS VS PU College, Mudigere *CGPA: 85.83%*

SSLC 2022–2023
GHP School, Mudigere *CGPA: 91.04%*
